**For Immediate Release:**

## **etherFAX Announces Partnership with Vivlio Health to Improve Interoperability**

*Vivlio Health Integrates etherFAX's Hybrid-Cloud Technology to Securely Receive Incoming Faxes, Clinical Data, and High-Resolution, Color Documents*

**Holmdel, New Jersey (August 24, 2022)** – etherFAX today announced its partnership with Vivlio Health, a leading provider of workflow automation technology for healthcare organizations. As part of the partnership, Vivlio Health will utilize the etherFAX Secure Exchange Network (SEN) to receive incoming faxes, clinical data, and high-resolution, color documents with ultra-fast transmission speeds and end-to-end encryption.

etherFAX SEN, a patented Infrastructure-as-a-Service solution, leverages a hybrid-cloud technology to provide 100% secure communications and data protection. With over six million connected endpoints, etherFAX SEN is the world's largest fax network supporting every major fax server, application, and fax-enabled device. Most recently, the etherFAX service achieved HITRUST Risk-based, 2-year Certification to further mitigate risk in third-party privacy, security, and compliance.

"We look forward to providing Vivlio Health with fast and secure fax communications," said Paul Banco, CEO and co-founder of etherFAX. "With a 99.99% uptime across our client base, the reliability of our network is unparalleled. Together with Vivlio Health, we are enabling healthcare information to be easily shared, accessed, and analyzed."

As a result of this partnership, physicians utilizing Vivlio's interoperability platform can serve patients faster, with fewer errors, as the result of receiving pertinent medical record history via etherFAX.

"We are proud to partner with etherFAX as we continue to deliver innovative technology to the healthcare community," said Matthew Halkos, CEO at Vivlio Health. "etherFAX's secure document delivery solutions allow us to maintain the highest level of security for sensitive patient data and complete a vital component of our interoperability offering."

As a cloud-based solution, etherFAX does not require a fax server or additional software. etherFAX and Vivlio Health can be easily integrated into existing workflows and customized to meet specific customer requirements.

### **About Vivlio Health**

Founded in 2020, Vivlio Health offers a secure, cloud-based application to the clinical care team that simplifies and streamlines the process to acquire and transfer medical records and images. At its core, Vivlio serves healthcare providers who serve patients. Accessing vital clinical data and making it quickly and easily available improves patient care, decreases the labor-intensive tasks involved in assembling this data, and increases the number of patients a health system can serve. For more information, visit us at [www.vivliohealth.com](http://www.vivliohealth.com), or call us at 404-777-5772.

### **About etherFAX**

Founded in 2009, etherFAX® offers a secure document delivery platform and suite of applications widely used across a broad range of industries to digitize workflows and optimize business processes. As a leading provider of hybrid-cloud fax solutions supporting healthcare enterprises, etherFAX securely transmits protected health information and high-resolution, color documents directly to applications and devices with end-to-end encryption and ultra-fast transmission speeds. etherFAX's secure, cloud-based, and encrypted data exchange solutions operate in a HIPAA and SOC 2® compliant environment that is both HITRUST CSF® and PCI DSS certified.
